

Project Profile

HOPKINSVILLE SPORTSPLEX

Location: Hopkinsville, Kentucky

Client: City-County Owned Facility

Project: New Facility

Type of Venue: Multi-Purpose

Features: 3 basketball courts, 6 volleyball courts, indoor soccer/multi-purpose turf field, baseball/softball batting cages, archery space, spectator areas, concessions area and meeting rooms

Products/Supplies: One BAP3.0 Kick Series Dasher Board System

Background: The Hopkinsville Indoor Sportsplex was funded as part of a city-county collaborative plan to improve the wellness, infrastructure, and neighborhoods in the Christian County area. The 54,000 square foot facility hosts both recreational programming and tournament events including baseball/softball, volleyball, soccer, basketball, golf, track, archery, and non-sport venues.

The 185' x 80' BAP 3.0 Kick Series Dasher System features a combination of solid dasher panels and tempered glass with powder coated posts and segmented radius corners. Soccer goals with a manually retractable closure system, player boxes, and protective black nylon netting complete the versatile system.

"After realizing our original design for our multi-purpose facility would vastly limit the age groups we were serving, we reached out to Becker Arena Products for a dasher board system with little time to spare. Our experience with them was phenomenal. We couldn't have asked for anyone to be more cooperative. We were pleased with everything from their ability to meet our time constraint to their pricing to the dedication of the install team. We were thoroughly impressed."

-Tony Henson, Facility Director
