

# PROJECT PROFILES

## Dakotah Ice Center in Prior Lake, Minnesota USA

We built the first set of boards for this customer in the Dakotah Sport and Fitness building so we were very excited to be asked back again when this new rink went in. Becker Arena Products built and installed our Signature Series BAP6.0 Steel Frame Dasher Boards with our Vision Radius Shielding System complete with protective netting. We also built and installed all of the bleacher seating, the locker room benching and coat hooks. We supplied and installed the rubber flooring all around the rink. We also sold, delivered and trained the staff on the Olympia Ice Resurfacer.
