

**PT# 50.10210**

**INSTANT SLUSH Ice Repair** seals the gap (with ice in) where the dasher board kickplate meets the ice rink floor. Apply when starting your new sheet of ice at the beginning of the season.

**INSTANT SLUSH Ice Repair** also helps to repair cracks or divots in the ice surface during the season.

**Directions to mix:**

1. Combine one level scoop (provided) with 4 gallons of clean, cold water
2. Stir gently until product evenly distributed
3. Let stand 5 minutes
4. Stir again
5. Ready to use

Note that by adding or subtracting water you can adjust consistency to your liking

**Directions for use:**

1. Trowel your INSTANT SLUSH Ice Repair mixture into damaged area as needed.
2. Allow time to freeze.
3. Resurface if needed.

DOES NOT CONTAMINATE WATER. Caution: Product is slippery when wet. Swells in water with a product to liquid ratio of 1:510. Avoid contact with skin or eyes. Avoid dust formation. Do not breathe dust. Wash hands after use. Gloves are recommended. Refer to Material Safety Sheet for further information
