Project Profile

CONNERY ICE ARENA

Location: Lynn, Massachusetts

Client: Public

Project: Renovation

Type of Venue: Community Arena

The Connery Ice Arena is one of 23 rinks managed by FMC Ice Sports. It was in need updating, and FMC reached out to Becker Arena Products for the job. Watch the virtual tour [here](#).

We provided one BAP6.0 Signature Series steel dasher frame system with player and penalty boxes, “Vision” supportless tempered glass shielding, and permanent backer panels.

The existing boards were taken in on trade through our used division, Rink Equipment Resource.

“The installation of the boards at the Connery Rink went very smooth. A large contributor to a successful installation was the organization and thoroughness from Becker Arena Products. Thank you for everything!”

Kyle Correira – Director of Maintenance & Operations, FMC Ice Sports
