

Project Profile

ST. OLAF COLLEGE ICE ARENA

Location: Northfield, Minnesota

Client: Private College

Project: Repurpose/New Construction

Type of Venue: Collegiate

Seating: Capacity of 804

Facility Clients: St. Olaf Mens' and Womens' NCAA Division III hockey teams, club figure skating, other ice-related activities and dry floor events when ice is out.

Products/Supplies: One BAP6.0 Signature Series Dasher Board System 200' x 85' with a combination posted and seamless shielding system and protective netting. Stamina rubber flooring installed in the hallways and locker rooms used for hockey, volleyball, baseball, softball and soccer. Various ice arena accessories.

Background:

Originally built as a fieldhouse in 1967, Becker Arena Products partnered with Boldt Construction to transform the space into an NHL-sized ice arena in 2018. The project was made possible through the monetary support of more than 125 alumni, parents, and friends. St. Olaf College hockey teams compete in the Minnesota Intercollegiate Athletic Conference as NCAA Division III members. The ice is also rented out to the community's youth and high school teams.
