

Becker Arena Products

Ultimate™ *In-Ice Vinyl* **CURLING CIRCLES**

Ultimate™ Vinyl Mesh Product
Instructions
Easy As 1 – 2 – 3

Installation

- 1 - Unpack and layout on the ice
- 2 - Position into place
- 3 - Lightly spray to seal

It is most common to put down approximately a ¼" layer of ice, paint the ice white and then install the curling circles. Pucks are a useful tool if some of the vinyl is curled up during the freezing in process. Only a few minutes using the pucks as weights are necessary for curled edges to stay frozen flat. *Creases can be ironed out (on low heat) without harming the material.*

Removal

- 1 - Shave ice to 1/4"-3/8" above lines
 - 2 - Hammer out ice on one end
Please wear safety glasses
 - 3 - Pull to remove
- * Dry completely, roll backwards and store in original containers
