

BAP6.0 DASHER BOARD SYSTEM

Tested for toughness.

BAP6.0 Series System

BAP6.0 Dasher Board System

When your rink has a full ice schedule with little downtime, look to the BAP6.0 Dasher Board System for the perfect solution. This heavy-duty steel framed dasher board system is built to withstand the daily usage of a community rink at all levels of play. The unique design allows for ease of operation that stands the test of time. Hot dipped galvanized frames combat rust – an issue in arenas where moisture is present. Top quality, 1/2" thick high density polyethylene facing and kickplate with 3/4" UV caprail is used to complete the system.

Key features:

- 1** Fully welded steel frame.
- 2** Hot-dipped galvanizing which offers anti-corrosive and self-healing properties, protects from rust.
- 3** Full angle framed construction.
- 4** Innovative shielding support with permanent rubber gasketing that stays in place when the glass is removed.
- 5** Unique attachment of dasher facing for expansion and contraction.

Specifications

Standard Sill Colors

RED

BLACK

Regardless of whether your system is steel or aluminum, the constant up and down regiment will take its toll on a set of dasher boards. Steel frame dashers should by their nature hold up better to constant tear downs and set-up over aluminum dashers. Although heavier in weight, steel dashers can be repaired on site a lot easier than aluminum dashers.

Incredible Strength

- Fully welded steel frame is available in 6" and 7" widths.
- Formed end channels and angles provide added durability.
- All hardware is made from heavy duty zinc plated steel.

Added Protection

- 3 vertical supports for every 8 foot section create added stability for tempered glass.
- Unique slotted attachment of dasher facing allows for expansion and contraction – perfect for all-season arenas.
- Routed groove in caprail allows for shielding stability.

Innovative Design

- Shielding support with permanent rubber gasketing that stays in place during glass replacement.
- Easy replacement kickplate design.

Options

- Protective nettings
- Powder coated shield supports
- Custom color caprail and kickplate
- Quick release or permanent backer
- Sill colors
- Ice dams
- Advertising trim kits
