

BAP6.0 OUTDOOR DASHER BOARD SYSTEM

Get outside and play.

BAP6.0 Outdoor System

BAP6.0 Outdoor Dasher Board System

The heavy-duty steel framed dasher board system is the same as our BAP6.0 indoor system; fully welded and tested for toughness. The fiberglass facing and kickplate resists fading and warping. UV stabilized high density polyethylene caprail is designed to withstand the expansion and contraction due to temperature changes. BAP6.0 low-maintenance outdoor dasher board systems adapt to all the elements providing a structure that will remain solid, aligned and looking good each season and for years to come.

Key features:

- 1 Featuring a hot-dipped galvanized steel frame or powder coated aluminum frame construction.
- 2 Rink dasher facing and kick plate panels are made from U.V.-protected exterior-grade fiberglass or clear polycarbonate.
- 3 Rink dasher facing and kick plate panels are made from U.V.-protected exterior-grade fiberglass or clear polycarbonate.
- 4 Customizable to fit your specific needs.

This dasher board system is for outdoor inline, ice hockey or general recreational skating. Becker Arena Product's Signature Series OUTDOOR steel frame boards are built to withstand the punishment at the professional level as well as the daily use and abuse at the community level and remain solid, aligned and looking good. Most uncovered outdoor systems are faced and capped with white high impact fiberglass facing and kickplate to prevent damage from the sun.

Incredible Strength

- Fully welded steel frame is built in 6" and 7" width.
- Formed end channels and angles provide added durability.
- All hardware is made from heavy duty zinc plated steel.

Added Protection

- 3 vertical supports for every 8 foot section creates added stability for tempered glass.
- Unique slotted attachment of dasher facing allows for expansion and contraction.
- Routed groove in caprail allows for shielding stability.

Innovative Design

- Shielding support with permanent rubber gasketing that stays in place during glass replacement.
- Kickplate design simplifies replacement.

Options

- Chain-link fencing
- Custom color caprail and kickplate
- Sill colors
